

Empowering Your Team for Tomorrow's Challenges

GEN AI CORPORATE TRAINING PROGRAMS

NextAgile enables professionals and teams to go beyond theory—equipping them with the skills, tools, and confidence to apply AI strategically and responsibly across business functions.

Why NextAgile?

- Practitioner-led delivery
- Measurable business & delivery outcomes
- Hands-on projects & case studies
- Scalable & responsible AI

Our Key Programs

Our Gen AI programs equip professionals with practical, enterprise-ready AI skills—combining clear concepts with hands-on application for real-world business impact.

Agentic AI for Non-Tech Professionals

Understand AI agents & learn effective collaboration with autonomous systems—no coding required.

Gen AI Foundation

Build essential AI literacy and understand LLMs, prompt design, & responsible AI principles.

Gen AI for Enterprise

Learn to design, scale, and govern enterprise-grade AI solutions for real business impact.

Gen AI for Software Developers

Master AI integration, model fine-tuning, and deployment workflows using leading frameworks and APIs.

Advanced Prompt Engineering Techniques

Create precise, reliable, and scalable prompts that drive consistent AI performance.

LangChain Mastery for Gen AI

Learn to build and orchestrate powerful LLM-based applications using LangChain tools and patterns.

Gen AI Developer Program

A complete, hands-on journey from AI fundamentals to full-stack GenAI solution development.

Enterprise Software Architect

Design scalable, secure, and cloud-native architectures that enable enterprise agility and innovation.
